Revolutionizing Care with Reliable Solutions and Unmatched Expertise

The heart of minimal Access

We aim to create a world of ease to obtain minimal access surgery services and supplies, by creating sustainable partnerships that enhance productivity.

OUR SERVICES

1. We offer High quality, durable and affordable minimal access supplies
2. We offer Timely and efficient delivery of Minimal access supplies.
3. We offer technical and advisory minimal access services
4. We purpose to increase community awareness about minimal access services

NEW ADDITIONS TO OUR PRODUCTS CATALOGUE

We are excited to introduce new, advanced products designed to enhance precision and improve patient outcomes in minimally invasive surgeries. Our expanded catalog continues to offer durable, affordable solutions, backed by timely delivery and expert support. Experience the next generation of surgical innovation with us.

PPH hemorrhoidal stapler (32,33)mm

- Minimally Invasive
- Preservation of Sensory Areas in Surgery
- Faster Recovery
- Reduced Complications

Hemoclip

- Precise Vessel Control
- Minimally Invasive Application
- Versatility
- Reduced Risk of Complications

Linear cutter reloads 3.8 and 4.8mm (80mm)

- Precision and Versatility
- Reduced Tissue Trauma
- Efficiency in Surgery
- Enhanced Healing

Skin stapler

- Rapid Closure
- Minimally Invasive
- Consistent Stapling
- Reduced Infection Risk
- Easy Removal

Skin staple remover

- Gentle Removal
- Improved Efficiency
- Enhanced Safety
- Reduced Risk of Infection
- User-Friendly Design

Latex T Tube biliary drainage

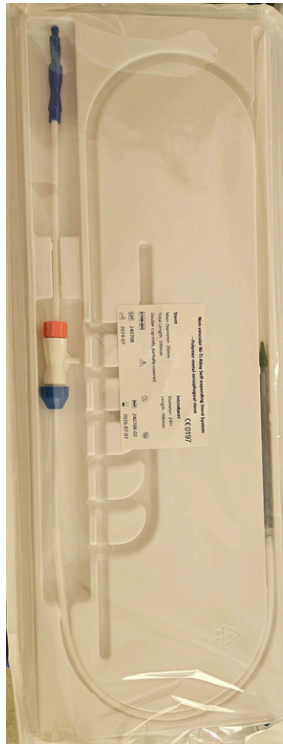

- Efficient Bile Drainage
- Prevents Bile Duct Strictures
- Minimally Invasive Post-Operative Management
- Prevents Infection and Leakage

Bite block/ mouth guard endoscopy

- Patient Safety
- Protection of Equipment
- Enhanced Procedure Control
- Comfort and Security

Esophageal SEMS stent

- Endoscopic Placement
- Immediate Relief of Obstructions
- Improved Quality of Life
- Temporary and Reversible
- Reduces Complications

EEA circular stapler

- Efficient Anastomosis
- Minimally Invasive Design
- Consistent Stapling
- Enhanced Visibility
- Versatility

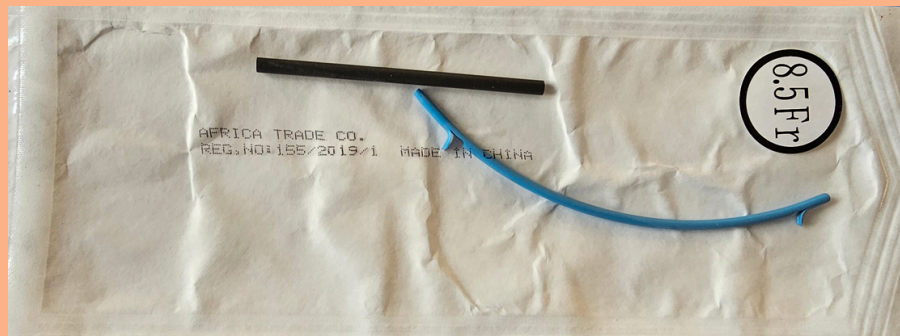

Diathermy pencils double packaged

- Enhanced Precision
- Reduced Tissue Trauma
- Double Packaging for Safety
- Versatile Application
- Efficient Workflow

Biliary plastic stents

- Effective Biliary Drainage
- ERCP Placement
- Temporary or Permanent Options
- Improved Quality of Life
- Cost-Effective Solution

Linear cutter 80mm

- Precise Cutting and Stapling
- Minimally Invasive Surgery
- Secure Tissue Closure
- Enhanced Surgical Efficiency
- Reduced Postoperative Complications

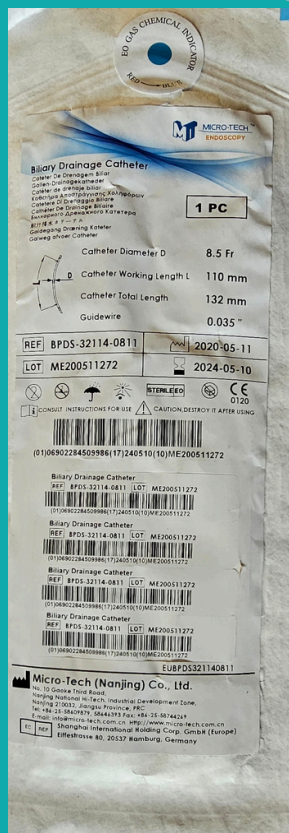

Wound vacuum drain

- Enhanced Healing
- Reduced Infection Risk
- Prevent seroma formation
- Improved Patient Comfort
- Versatile Usage

Biliary Drainage Catheter

- Effective Bile Drainage
- Minimally Invasive Placement
- Improved Patient Comfort
- Versatile Applications
- Facilitates Further Treatment

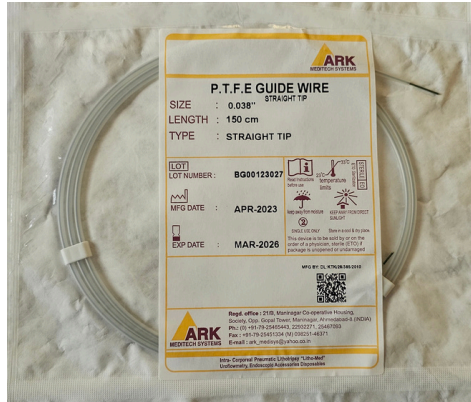

Esophageal/Colonic/Biliary 240cm Baloon Dilator

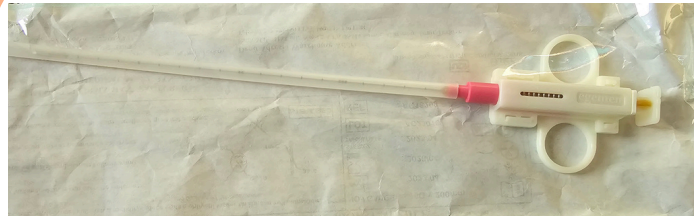

- Effective Stricture dilatation
- Endoscopic intervention
- Improved Patient Comfort

Ureteric stent guide wire

- Enhanced Navigation
- Flexible and Durable
- Minimally Invasive Approach
- Improved Patient Comfort
- Facilitates Complex Interventions

Tru cut core biopsy gun

- Minimally Invasive Sampling
- High Precision
- Versatile Applications
- Improved Patient Comfort
- Rapid Results

Diathermy pad double pole

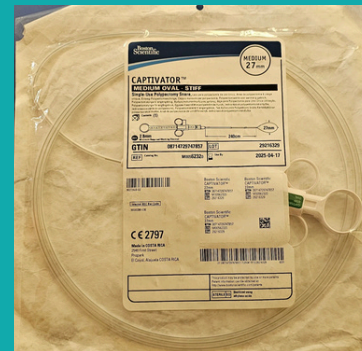

- Better adhesion
- Maximum conduction

Ureteric stents 4,5,6 and 7FR

- Effective Urinary Drainage
- Minimally Invasive Placement
- Variety of Sizes
- Improved Patient Comfort
- Facilitates Further Treatment

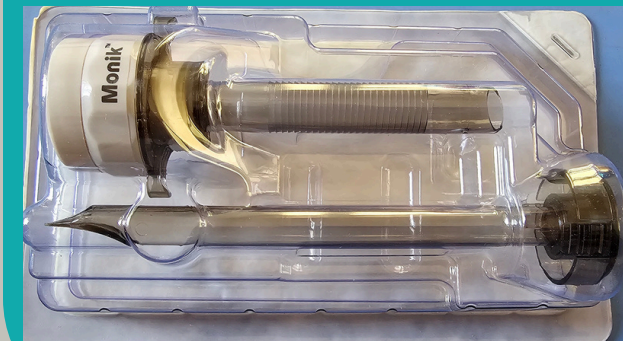

Polypectomy Snare

- Enhanced Safety
- Precision Removal
- Endoscopic Approach
- Improved Patient Comfort
- Versatile Application

Laparoscopic Trocars/Ports (5mm, 10/12mm)-visiports

- Minimally Invasive Access
- Versatile Sizes
- Enhanced Visualization
- Improved Surgical Control
- Patient Benefits

Esophageal Variceal Band Ligator

- Minimally Invasive Treatment
- Effective Hemostasis
- Precision Application
- Rapid Procedure
- Reduced Hospital Stay

Hernia mesh(soft, partially absorbable)

- Reduced re-occurrence
- Enhanced Comfort
- Tissue Integration
- Reduced Risk of Complications
- Versatile Applications

Titanium clips(LT 200,300 and 400)

- Minimal Tissue Reaction
- Durability and Strength
- Precision Application
- Ease of Use
- Reduced Postoperative Complications

PEG kits standard (16, 20, 22, 24FR)

- Minimally Invasive Feeding Access
- Variety of Sizes
- Improved Nutritional Support
- Streamlined Procedure
- Enhanced Patient Safety

Let's work together to
improve patient care.
